🚩 South African

Profile

Final-year BCom Information Systems student at the University of Johannesburg (academic average: 79.5%), with proven experience delivering end-to-end data solutions from raw data cleaning to executive dashboards. Recognised for transforming messy, high-volume datasets into actionable business insights, including engineering a pipeline that reduced data errors and improved reporting efficiency. Fluent in SQL, Excel, and Power BI, with hands-on exposure to KPI development and business reporting. Skilled at bridging the gap between technical data work and non-technical stakeholders, while building a growing toolkit in AI-powered automation and cybersecurity. Seeking opportunities to apply technical expertise, continue learning, and contribute to innovative fintech and technology solutions.

Experience

01/2025 – 03/2025 Johannesburg, South Africa	Student Accommodation Promoter <i>Gateway student accommodation</i> • Led marketing and recruitment campaigns, increasing student engagement. • Developed communication and promotional strategies tailored to student needs.
11/2023 – 01/2024 Johannesburg, South Africa	Cashier <i>Gold Reef City Theme Park</i> • Delivered excellent customer service while managing cash transactions accurately. • Strengthened teamwork and problem-solving in a fast-paced environment.
2019 – 2020 Johannesburg, South Africa	Part-time Intern <i>LvBlue Internet Cafe</i> • Assisted customers with computer and internet use. • Handled payments and customer service.

- IsiZulu

Skills

Technical

Python, C#, SQL, HTML, CSS, JavaScript, GUI Design, Object-Oriented Programming, Pivot Tables (Excel), Data Design (ERD / Entity Relationship Modelling), Database Management, Systems analysis and Design, Cybersecurity Fundamentals, Data Analysis and Reporting, Cloud Database Concepts, AI Agents, AI for Cybersecurity, Prompt Engineering, Responsible AI, Penetration Testing, Security Operations, Governance, Risk Management, and Compliance (GRC), Incident Response, Threat Detection

Professional

Team Collaboration, Communication, Time Management, Adaptability, Basic Networking, Attention to Detail, Leadership, Self-Motivation, Ethics, Continuous Learning, Presentation Skills, project management

Analytical

Reporting & Analysis, Critical & Analytical Thinking, Problem-Solving, Data Visualization, Project Planning, Business Process Improvement, Decision Making using Data, Risk Analysis, Business Analysis

Short Course Certifications

cybersecurity Fundamentals 2025

Covered key topics including threat detection, risk assessment, and secure system practices. Strengthened my understanding of cybersecurity principles and their application in digital environments.

Artificial Intelligence in the 4IR 2023

Explored how AI is transforming industries in the Fourth Industrial Revolution. Gained hands-on insight into automation, machine learning, and ethical AI applications. Excited to apply these skills in data driven environments and connect with professionals driving innovation.

Data Analysis with Excel Pivot Table 2025

Developed practical skills in organizing, filtering, and visualizing data for business insights. Strengthened my ability to create dynamic reports and uncover trends using Excel's analytical tools.

Programming & Grit Bootcamp 2024

Learned Python fundamentals, algorithmic thinking, and structured problem solving. This experience sharpened my technical foundation and strengthened my ability to approach challenges

Dreamathon South Africa 2024

Joined a 2 day immersive experience focused on game development in pediatric palliative care. Collaborated with innovators and educators to explore how design and technology can support compassionate healthcare solutions.

Cybersecurity with AI Bootcamp 2026

Developed practical skills in applying AI to real-world cybersecurity workflows across Red Team, Blue Team, and GRC functions. Strengthened my ability to use AI agents and automation tools like Microsoft Copilot and n8n to accelerate threat detection, incident response, and reporting.

Projects

The Baby Care Market Excel Analysis Excel

Excel · Pivot Tables · Data Visualisation [2025]

- Cleaned and preprocessed a baby care wet-wipes market dataset of 501 product records spanning 98 manufacturers and 140 brands, resolving 760+ missing data points across value and volume fields before analysis.
- Built customised pivot tables with interactive slicers to segment performance by brand, manufacturer, and product attribute, surfacing Baby Crema and Pampers as the top two revenue-generating brands in the category.
- Delivered trend analysis identifying PH-Balanced products as the dominant segment at 48.9% of category value, with total market value up 3.2% year-on-year, informing which brands and attributes merit continued focus.

GitHub: https://github.com/Nokukhanya021/Baby_Care_Market_Excel_project/tree/main 

SkillSync UJ Website

HTML5 · CSS3 · JavaScript · GitHub Pages · UX/UI [2025]

- Designed and deployed a 3-page responsive web application from scratch using HTML5, CSS3, and JavaScript, covering a branded home page, services directory, and about & contact section for UJ's peer-powered skill-sharing platform.
- Applied UX/UI design principles including SCAMPER ideation and structured visual hierarchy to deliver a clean, conversion focused user experience, hosted live on GitHub Pages.

GitHub: github.com/Nokukhanya021/SKILL-SYNC 

SQL Projects Querying & Data Analysis

SQL · SSMS [2026]

- Wrote queries spanning SELECT, JOINS, GROUP BY, and HAVING clauses to extract and aggregate data across datasets, calculating metrics such as COUNT/SUM/AVG.
- Applied CASE and COALESCE logic to handle conditional business rules and null values, and used subqueries/UNION to combine multi-table results into a single dataset.
- Implemented DML/DDL operations (INSERT, UPDATE, CREATE TABLE, views) to build and maintain a working relational schema.

GitHub: https://github.com/Nokukhanya021/SQL_PROJECTS 

AI-Powered Phishing Incident Triage System

n8n · Docker · Webhooks · AI/LLM Integration · Google Sheets API [2026]

- Deployed an n8n workflow automation pipeline via Docker with custom port configuration to automate phishing email triage end-to-end.
- Engineered a webhook-based ingestion flow that parses sender, subject, and URL fields from incoming emails for automated analysis.
- Integrated an AI model to score risk and classify severity per email, logging results to Google Sheets

GitHub: <https://github.com/Nokukhanya021/AI-Powered-Phishing-Incident-Triage-System-n8n-> 

HexStrike AI: Automated Subdomain Recon & Risk Analysis Tool

MCP Server · Subfinder · Claude AI [2026]

- Built a custom MCP server connecting Claude AI to security tooling, enabling automated AI-driven analysis of recon data.
- Used Subfinder to passively enumerate subdomains across authorized training targets provided via the Cybersecurity with AI Bootcamp, feeding results into Claude for automated risk analysis.
- Generated structured, severity-rated risk reports, surfacing high-risk exposures such as exposed Jenkins and Grafana instances.

GitHub: <https://github.com/Nokukhanya021/HexStrike-AI-Automated-Subdomain-Recon-Risk-Analysis-Tool> 

CAI: Cybersecurity AI Agent Framework

Docker · Linux/WSL2 · MCP · LLM Agent Orchestration [2026]

- Deployed and configured a multi-agent cybersecurity framework for CTF (Capture The Flag) environments, running parallel AI agents (red teamer, network traffic analyzer) with integrated MCP tooling.
- Containerized the agent environment using Docker on a Linux/WSL2 setup, ensuring consistent, reproducible deployment and resource management.
- Managed agent memory, context, and session state across concurrent agents, validating functionality by switching the underlying LLM to Gemini 2.5 Flash via CLI.
- GitHub: <https://github.com/Nokukhanya021/CAI-Cybersecurity-AI-Agent-Framework> 

insightbank churn dashboard

Power BI · DAX · Data Visualisation [2026]

- Built a 4-page interactive Power BI dashboard analyzing 10,000 retail banking customer records, uncovering an overall churn rate of 20.4% and identifying the strongest churn predictor: customers with 3+ products churned at 83–100%, versus 7.6% for those with 2 products.
- Created custom DAX measures and calculated columns to segment customers by geography, age, credit score, and value tier, surfacing critical patterns including elevated churn in Germany (32%) and among ages 51–60 (56%).
- Designed conditional-formatted heatmaps and cross-tabulated risk tables to translate findings into actionable retention recommendations for stakeholders.

GitHub: github.com/Nokukhanya021/insightbank-churn-dashboard 

Personal Portfolio Website

HTML5 · CSS3 · JavaScript · GitHub Pages · Responsive Web Design · UX/UI [2026]

- Designed and developed a fully responsive personal portfolio website to showcase my projects, technical skills, certifications, education, and professional experience using HTML5, CSS3, and JavaScript.
- Implemented interactive features including smooth scrolling, project showcases, downloadable CV, GitHub and LinkedIn integration, and a professional certifications gallery. Deployed the website using GitHub Pages with a focus on performance, accessibility, and modern UX/UI design.
