SELECTED PROJECTS

InsightBank Churn Dashboard (2026)

- Builta 4-pagePower BIdashboard on 10,000 retail banking records; uncovered 20.4% churn rate, with customers holding 3+ products churning at 83–100%.
- Created DAX measures and heatmaps surfacing elevated churn in Germany (32%) and ages 51–60 (56%), informing retention strategy.

SQL Projects: Querying & Data Analysis (2026)

- WroteSELECT, JOIN,GROUPBY, CASE and subquery logic to extract, clean and aggregate multi-table data; implemented DML/DDL to build a working relational schema.

The Baby Care Market Excel Analysis (2025)

- Cleaneda 501-recorddataset (98 manufacturers), resolving 760+ missing data points; built interactive pivot tables identifying top revenue brands and a dominant 48.9% product segment.

AI-Powered Phishing Incident Triage System (2026)

- Deployed a Dockerised n8n workflow with webhook ingestion and AI risk scoring, logging classified results to Google Sheets.

HexStrike AI: Automated Subdomain Recon Tool (2026)

- Built a custom MCP server connecting ClaudeAI to security tooling for automated, severity-rated risk reporting on recon data.
